8 SYNOPSIS: Under existing law, the Elevator Safety  
9 Review Board regulates elevators. The board is  
10 administratively located within the Department of  
11 Labor.

12 Under existing law, platform lifts and  
13 stairway chairlifts in private residences are  
14 required to have a certificate of operation.

15 Existing law does not specify that an  
16 elevator which is out of compliance may be required  
17 to be placed out of service until found to be in  
18 compliance.

19 This bill would require any newly installed  
20 residential elevator in a private residence and any  
21 residential elevator installed in any other  
22 location to be inspected and receive a certificate  
23 of operation. The bill would authorize the owner of  
24 any private residence to have an elevator in the  
25 residence inspected. The bill would also specify  
26 that the administrator of the board may require a  
27 conveyance which is out of compliance to be placed

1 out of service until reinspected and found to be in  
2 compliance and would specify that the state  
3 regulation of elevators and conveyances would  
4 preempt local regulation.
