

FISCAL NOTE

Senate Bill 236

Committee: State Governmental Affairs

Sponsor: Senator Larry Stutts

Analyst: Tiffany Weaver

Date: 04/02/2024

Senate Bill 236 as introduced would decrease certificate of need receipts to the State Health Planning and Development Agency (SHPDA) by an undetermined amount dependent on the number of rural health care providers located outside of a metropolitan statistical area, pursuant to the provisions of this bill, beginning October 1, 2024 that would no longer need a certificate of need (CON) to: (1) propose, acquire, construct, operate, furnish or offer a new institutional health service; or (2) arrange or commit to the financing of a new institutional health service. According to SHPDA, the average annual application fees collected from facilities classified as rural was \$53,000 based on fiscal year 2022 and fiscal year 2023 data.
