

FISCAL NOTE

House Bill 215

Committee: Ports, Waterways & Intermodal Transit Sponsor: Representative Jennifer Fidler

Analyst: Mathieu Fuller

Date: 03/06/2024

House Bill 215 as reported by the Committee on Ports, Waterways, and Intermodal Transit could decrease potential receipts to the Department of Conservation and Natural Resources (DCNR) by an estimated \$5,200 annually, based on 2023 dredging permit data provided by DCNR, by reducing the amount of fees collected from a residential coastal riparian owner for permits issued for the dredging of sand and source sediment to be used for the construction of a living shoreline.
