

FISCAL NOTE

House Bill 61

Committee: Education Policy

Sponsor: Representative Susan DuBose

Analyst: John Friedenreich

Date: 04/15/2025

House Bill 61 as passed the House of Representatives would increase the obligations of the local boards of education, beginning with the 2026-2027 school year, by an undetermined amount dependent on the cost of any required increase in instructional personnel and/or classroom space to accommodate home-schooled students participating in career and technical programs in public schools, as provided by this bill. These obligations could be offset, in whole or in part, by the collection of course fees received from the student equal to the fee charged to an enrolled public school student.

Additionally, this bill would increase the administrative obligations of the State Board of Education and the local school boards of education to adopt rules and policies, respectively, pursuant to the provisions of this bill.
