Replace line 101 on page 4 with the following:

the premises of a licensee to another person due to a disease if any of the following are satisfied:

a. The cervid has tested negative for the disease pursuant to an antemortem test approved by the State Veterinarian prior to transferring.

b. The cervid has a genomically estimated breeding value that meets or surpasses the minimum value established by the State Veterinarian, which shall include the SS allele being at codon 96.

c. The premises from which the cervid is transferred is double fenced.
