

FISCAL NOTE

House Bill 566

Committee: Transportation, Utilities, and Infrastructure Sponsor: Representative Paul W. Lee

Analyst: Mathieu Fuller

Date: 03/10/2026

House Bill 566 as introduced could decrease business license fee receipts to municipalities by an undetermined amount dependent on the difference in the amount of license fees collected under current law and the amount collected pursuant to this bill which would provide for such fees to be either a flat amount or based on the gross receipts derived from work performed within the municipality for a business not located in the municipality.

This bill could also further decrease potential business license fee receipts to municipalities by an undetermined amount dependent on the amount of license fees foregone for certain businesses that work on county projects located on county property and otherwise would pay such fees under current law.
