

FISCAL NOTE

Senate Bill 97

Committee: Healthcare

Sponsor: Senator Gerald Allen

Analyst: Tiffany Weaver

Date: 02/25/2026

Senate Bill 97 as introduced would create the Alabama Health Command, as an independent state agency responsible for designating an entity to develop and provide standards and qualifications for the utilization of a virtual AI-assisted health platform to be used by rural health care providers in the state. This could increase the obligations of the State General Fund, presumably, by an undetermined amount dependent on, at a minimum, the cost to hire a director to implement and administer the provisions of this bill and any necessary personnel.
