Overview

Tax expenditures are provisions of law that allow for special treatment of a source of income or certain types of expenses that results in a reduction in the tax liability for a taxpayer or group of taxpayers. In Alabama, these expenditures are established by statute and, in some cases, the Constitution. In most cases, the tax benefits realized by the taxpayer or group of taxpayers could be provided by direct appropriation; therefore, the provisions are referred to as "expenditures". Expenditures represent revenues that would have otherwise been generated if not for the preferential treatment.

Tax expenditures are intended to achieve a policy objective or encourage some activity. The value or cost of any tax expenditure can be thought of as the amount of money required to provide the same level of support through direct appropriation rather than preferential tax treatment. The benefits of tax expenditures are received by businesses and individual taxpayers and are present in all of Alabama's major taxes, including the individual income tax, corporate income tax, and sales and use taxes.

The purpose of this report is to list the tax expenditures for major tax sources and, where possible, provide an estimate of the value of the tax expenditures. This report *does not* include:

- 1. An evaluation or recommendation regarding the various tax expenditures as to their effectiveness in fulfilling the desired public policy objective.
- 2. Estimates of the impact of the various exemptions on local government revenues, although many of the exemptions also apply to local governments.
- 3. Estimates of the tax expenditures associated with professional and recreational license fees. Those funds are utilized to regulate the affected profession or activity and do not generate funds for the general benefit of the state.
- 4. With certain exceptions, revenue lost due to government exemptions is not estimated. The state generally does not tax other governments and many taxes include those types of exemptions.
- 5. Any incentives or other matters included in the report required by Section 40-18-379, *Code of Alabama 1975*.

Tax Expenditure Report Requirement

Section 29-5A-46, *Code of Alabama 1975*, requires the Fiscal Division of the Legislative Services Agency to prepare and submit an annual report to the Legislature which lists all state tax expenditures and the estimated costs associated with each of the tax expenditures. For the purposes of this report, tax expenditures mean state revenue losses attributable to a special exclusion, exemption, or deduction, or which provide a special credit or preferential tax rate.

The statute outlines the information required to be included in the report as follows:

- 1. Each annual tax exemption and its constitutional and/or statutory citation.
- 2. An estimate of the revenue loss to the state caused by each of the tax expenditures for the most recently completed fiscal year.
- 3. Tax expenditures, organized by the funds into which the tax expenditures would be dedicated, but for the exemptions and rate differentials.

We will modify future reports as necessary to present any additional information required or eliminate information that is no longer useful.

Data Sources and Methodology

To the extent possible, data from the Alabama Department of Revenue (DOR) was used to estimate the expenditures included in this report. When the required information was not available from the Department, other data sources such as information from other state agencies, the U.S. Census Bureau, the U.S. Bureau of Economic Analysis, the U.S. Department of Labor, proprietary information, and secondary sources were used. For the purposes of this report, the Fiscal Division made every effort to provide reliable, well supported estimates of the expenditures. In many instances, certain assumptions were made to provide a reasonable estimate. Because of the time required to process income tax returns, the most recent data available from the Department of Revenue for individual income tax is Tax Year (TY) 2019 and Tax Year (TY) 2019 for corporate income tax. Also due to the time required to file tax returns, the most recent data available for insurance premium tax is TY 2019.

The following methodology was utilized in compiling the estimates:

1. Each tax expenditure item was estimated independently of other tax expenditures although the existence of a tax provision may impact the use of another provision.

- 2. Tax expenditure estimates do not consider the impact on other taxes that might result from the elimination of a tax provision.
- 3. Provisions assigned a value of "(m)" represent a tax expenditure that is estimated to reduce state revenues by less than \$1 million. Provisions assigned a "(d)" represent a tax expenditure that is estimated to reduce state revenues by less than \$100,000.
- 4. If a lack of information prevents the Fiscal Division from making a reasonable estimate for any tax expenditure, the expenditure is listed with a notation that no estimate is available at this time (NEA).

Summary Charts

The following pages provide: (1) a recap of the amount of expenditures estimated by tax, including the total estimated revenue loss from the expenditures; (2) the funds affected by the tax expenditures and the revenue loss from the tax expenditures where estimates could be provided; (3) a chart comparing the taxes included in the report with the highest collections in FY2021 and the estimated tax expenditures for those taxes; and (4) a chart illustrating the five tax sources with the largest total tax expenditures.
