OVERVIEW

Tax expenditures are provisions of law that allow for special treatment of a source of income or certain types of expenses that results in a reduction in the tax liability for a taxpayer or group of taxpayers. In Alabama, these expenditures are established by statute and, in some cases, the Constitution. Generally, the tax benefits realized by the taxpayer or group of taxpayers could be provided by direct appropriation; therefore, the provisions are referred to as “expenditures”. Expenditures represent revenues that would have otherwise been generated if not for the preferential treatment.

Tax expenditures are intended to achieve a policy objective or encourage some activity. The value or cost of a tax expenditure can be thought of as the amount of money required to provide the same level of support through direct appropriation rather than preferential tax treatment. The benefits of tax expenditures are received by businesses and individual taxpayers. They are present in all of Alabama’s major taxes. This includes the individual income tax, corporate income tax, and sales and use taxes.

The number of expenditures listed represents the most relevant within each tax and may not include all the smaller expenditures that are included within the tax.

The purpose of this report is to list the tax expenditures for major tax sources and, where possible, provide an estimate of the value of the tax expenditures. This report does not include:

1. An evaluation or recommendation regarding the various tax expenditures as to their effectiveness in fulfilling the desired public policy objective.
2. Estimates of the impact of the various exemptions on local government revenues, although many of the exemptions also apply to local governments.
3. Estimates of the tax expenditures associated with professional and recreational license fees. Those funds are utilized to regulate the affected profession or activity and do not generate funds for the general benefit of the state.
4. With certain exceptions, revenue lost due to government exemptions is not estimated. The state generally does not tax other governments and many taxes include those types of exemptions.
5. Any incentives or other matters included in the report required by Section 40-18-379, *Code of Alabama 1975*.

Tax Expenditure Report Requirement

Section 29-5A-46, *Code of Alabama 1975*, requires the Fiscal Division of the Legislative Services Agency to prepare and submit an annual report to the Legislature which lists all state tax expenditures and the estimated costs associated with each of the tax expenditures. For purposes of this report, tax expenditures mean state revenue losses attributable to a special exclusion, exemption, deduction, or special credit or preferential tax rate.

The information required to be included in the report is as follows:

1. Each annual tax expenditures and its constitutional and/or statutory citation.

-
2. An estimate of the revenue loss to the state caused by each tax expenditure for the most recently completed fiscal year.
 3. Tax expenditures, organized by the funds into which the tax expenditures would be dedicated, but for the exemptions discounts and rate differentials.

When necessary, the Fiscal Division will modify this report to present additional information required or eliminate obsolete information.

Data Sources and Methodology

To the extent possible, data from the Alabama Department of Revenue (DOR) was used to estimate the expenditures included in this report. When the required information was not available from the Department, other data sources such as information from other state agencies, the U.S. Census Bureau, the U.S. Bureau of Economic Analysis, the U.S. Department of Labor, proprietary information, and secondary sources were used. Data compiled reflects the most current and accurate depiction of expenditure costs available. The Fiscal Division made every effort to provide reliable, well supported estimates of the expenditures. Totals presented may not represent the exact figures due to rounding to the nearest thousand.

The following methodology was utilized in completing the estimate:

1. Each tax expenditure item was estimated independently of other tax expenditures although the existence of a tax provision may impact the use of another provision.
2. Tax expenditure estimates do not consider the impact on other taxes that might result from the elimination of a tax provision.
3. If a lack of information prevents the Fiscal Division from making a reasonable estimate for any tax expenditure, the expenditure is listed with a notation that no estimate is available (*NEA*).

Summary Charts

The following pages provide:

1. A recap of the amount of expenditures estimated by tax, including the total estimated annual revenue loss from the expenditures.
2. A recap of the funds affected by the tax expenditures and the annual revenue loss from the tax expenditures where estimates could be provided.
3. A chart comparing the taxes included in the report with the highest collections in Fiscal Year 2022 and the estimated tax expenditures for those taxes.
4. A chart illustrating the five tax sources with the largest annual total tax expenditures.
